Addendum #1

April 10, 2015

1. Questions and Answers:

Question 1: We interpret the 40-page limit to mean that if we print double-sided, there are actually 20 sheets of paper, but 40 sides of text. Can you please confirm this?

Answer 1: This is incorrect. There may be up to 40 sheets of paper. Using your example, if you print double-sided, there can be up to 40 sheets of paper, which allows for 80 sides of text.
