

Pet Waste Pollution Prevention

Join us in Keeping Our Waterways Clean!

Did you know if you have a dog, you play a major role in pet waste pollution prevention efforts? Pet waste is a major contributor of stormwater pollution. It contains harmful bacteria and excess amounts of nutrients. When left on the ground, rain, snow melt and other water entering the storm drain system carries these pollutions with it. The end result is degraded water quality downstream. Please join us in keeping pet waste out of the water in and around Leesburg by pledging to be a responsible pet owner and promising to scoop the poop every time!

Now available in additional shapes!
Request yours today!

In return, we'll send you a FREE dog bone-shaped pet waste bag dispenser. This handy dispenser holds a roll of pet waste pickup bags and easily clips onto a leash or collar. Always have a bag handy!

Please visit www.leesburgva.gov for more information and to complete the on-line registration form to request your FREE pet waste bag dispenser. Limit 1 per household. After you receive your dispenser, stay tuned for information on our upcoming contest - your picture of your pet with their dog bone bag dispenser could win you a great prize! You may also email publicworks@leesburgva.gov for more information!
