Land Use Applications 2
Land Development Applications 3
Approved and Under Construction 4
Year-to-Date Development Summary 5

This report is a snapshot of land use and development activity at various stages in the Town of Leesburg: commercial, residential, mixed use, and institutional. Many projects entail multiple applications, some that are processed sequentially and some that are processed concurrently. However, this report lists each project only once, with the currently active “parent” application. Therefore, this report should not be considered a reflection of the workload of any Town department involved in the review and approval of land development applications.

Land Use Applications

Land use applications include Rezoning, Special Exceptions, and Minor Special Exceptions. These “legislative” applications typically require a public hearing and recommendation from the Planning Commission and a public hearing and action by the Town Council. Minor Special Exceptions go straight to Council without Planning Commission review.

Many projects have both Rezoning and Special Exception applications that are processed concurrently. Once a Rezoning and/or Special Exception application is approved, the next step in the development process is the submission of a Site Plan, Subdivision Plat, and/or Construction Drawings, depending upon the type of project.
